## **Building Internet Firewalls** Elizabeth D. Zwicky, Simon Cooper, D. Brent Chapman

In the five years since the first edition of this classic book was published, Internet use has exploded. The commercial world has rushed headlong into doing business on the Web, often without integrating sound security technologies and policies into their products and methods. The security risks--and the need to protect both business and personal data--have never been greater. We've updated *Building Internet Firewalls* to address these newer risks.

What kinds of security threats does the Internet pose? Some, like password attacks and the exploiting of known security holes, have been around since the early days of networking. And others, like the distributed denial of service attacks that crippled Yahoo, E-Bay, and other major e-commerce sites in early 2000, are in current headlines.

Firewalls, critical components of today's computer networks, effectively protect a system from most Internet security threats. They keep damage on one part of the network--such as eavesdropping, a worm program, or file damage--from spreading to the rest of the network. Without firewalls, network security problems can rage out of control, dragging more and more systems down.

Like the bestselling and highly respected first edition, *Building Internet Firewalls*, 2nd Edition, is a practical and detailed step-by-step guide to designing and installing firewalls and configuring Internet services to work with a firewall. Much expanded to include Linux and Windows coverage, the second edition describes:

- Firewall technologies: packet filtering, proxying, network address translation, virtual private networks
- Architectures such as screening routers, dual-homed hosts, screened hosts, screened subnets, perimeter networks, internal firewalls
- Issues involved in a variety of new Internet services and protocols through a firewall
- Email and News
- Web services and scripting languages (e.g., HTTP, Java, JavaScript, ActiveX, RealAudio, RealVideo)
- File transfer and sharing services such as NFS, Samba
- Remote access services such as Telnet, the BSD "r" commands, SSH, BackOrifice 2000
- Real-time conferencing services such as ICQ and talk
- Naming and directory services (e.g., DNS, NetBT, the Windows Browser)
- Authentication and auditing services (e.g., PAM, Kerberos, RADIUS);
- Administrative services (e.g., syslog, SNMP, SMS, RIP and other routing protocols, and ping and other network diagnostics)
- Intermediary protocols (e.g., RPC, SMB, CORBA, IIOP)
- Database protocols (e.g., ODBC, JDBC, and protocols for Oracle, Sybase, and Microsoft SQL Server)
- The book's complete list of resources includes the location of many publicly available firewall construction tools.

### **From reader reviews:**

#### **Alex Lynch:**

Now a day folks who Living in the era exactly where everything reachable by match the internet and the resources inside can be true or not call for people to be aware of each data they get. How people have to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Studying a book can help folks out of this uncertainty Information especially this Building Internet Firewalls book since this book offers you rich facts and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it as you know.

#### **Willie Blackburn:**

This book untitled Building Internet Firewalls to be one of several books this best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this kind of book in the book retail store or you can order it through online. The publisher of the book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Touch screen phone. So there is no reason to you personally to past this e-book from your list.

#### **Kurt Chapman:**

A lot of people always spent their very own free time to vacation as well as go to the outside with them family or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or playing video games all day long. If you need to try to find a new activity that's look different you can read a book. It is really fun to suit your needs. If you enjoy the book that you simply read you can spent the entire day to reading a e-book. The book Building Internet Firewalls it is rather good to read. There are a lot of individuals who recommended this book. These were enjoying reading this book. If you did not have enough space to develop this book you can buy the particular e-book. You can m0ore easily to read this book through your smart phone. The price is not to cover but this book features high quality.

#### **Ann Walsh:**

This Building Internet Firewalls is completely new way for you who has interest to look for some information since it relief your hunger associated with. Getting deeper you into it getting knowledge more you know or you who still having little digest in reading this Building Internet Firewalls can be the light food for you because the information inside that book is easy to get through anyone. These books develop itself in the form that is certainly reachable by anyone, yep I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there is no in reading a reserve especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the item! Just read this e-book sort for your better life and knowledge.
