Remote Sensing, Third Edition: Models and Methods for Image Processing

Robert A. Schowengerdt

Remote Sensing, Third Edition: Models and Methods for Image Processing Robert A. Schowengerdt

Remote sensing is a technology that engages electromagnetic sensors to measure and monitor changes in the earth's surface and atmosphere. Normally this is accomplished through the use of a satellite or aircraft. This book, in its 3rd edition, seamlessly connects the art and science of earth remote sensing with the latest interpretative tools and techniques of computer-aided image processing. Newly expanded and updated, this edition delivers more of the applied scientific theory and practical results that helped the previous editions earn wide acclaim and become classroom and industry standards. Dr. Schowengerdt presents an advanced unified framework and rationale that uniquely empowers the reader with the latest critical thinking skills and prerequisite knowledge needed to successfully design, develop and incorporate maintainable remote sensing solutions for real-world application. Advanced remote sensing image processing techniques such as hyperspectral image analysis, fusion of multisensor images and digital elevation model extraction from stereo imagery are discussed theoretically in terms of spectral, spatial, and geometric models. An expanded exercise section is also included at the end of each chapter allowing for the greatest level of mastery ever.

*Features a new lively discussion of the NASA EOS satellites, Terra and Aqua, and the commercial satellites IKONOS and Quickbird.

*New larger format provides additional access to 32 PAGE - FULL COLOR plate insert and improved readability

*Additional data processing algorithms help connect and enhance the collective understanding of engineering design and remotely sensed data

From reader reviews:

Robert Zamora:

The book Remote Sensing, Third Edition: Models and Methods for Image Processing make you feel enjoy for your spare time. You need to use to make your capable much more increase. Book can to get your best friend when you getting stress or having big problem with the subject. If you can make looking at a book Remote Sensing, Third Edition: Models and Methods for Image Processing to get your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You may know everything if you like open up and read a publication Remote Sensing, Third Edition: Models and Methods for Image Processing. Kinds of book are a lot of. It means that, science publication or encyclopedia or other people. So , how do you think about this publication?

Robert Sanders:

What do you about book? It is not important along with you? Or just adding material when you want something to explain what the one you have problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have extra time? What did you do? Everybody has many questions above. They should answer that question simply because just their can do in which. It said that about guide. Book is familiar on every person. Yes, it is appropriate. Because start from on guardería until university need that Remote Sensing, Third Edition: Models and Methods for Image Processing to read.

Thomas Major:

Now a day people who Living in the era wherever everything reachable by connect with the internet and the resources inside it can be true or not demand people to be aware of each information they get. How a lot more to be smart in acquiring any information nowadays? Of course the reply is reading a book. Studying a book can help men and women out of this uncertainty Information specially this Remote Sensing, Third Edition: Models and Methods for Image Processing book as this book offers you rich info and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it as you know.

Jerry Brower:

Reading a book for being new life style in this yr; every people loves to go through a book. When you go through a book you can get a lots of benefit. When you read guides, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you need to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, as well as soon. The Remote Sensing, Third Edition: Models and Methods for Image Processing will give you a new experience in studying a book.
