Quantum Jumping

Burt Goldman

Quantum Jumping Burt Goldman

The basic concept of Quantum Jumping is that you can become anyone you can imagine; endowed with any talent, any skill. Here you will learn about the infinity of universes. The scientific concept of a vast endless sea of bubbles, each bubble containing a great universe. The concept of infinity is that there are an unending, all encompassing mass of events and people in one of those universes. There's a twin self, of yours, in one of those universes in every situation imaginable. There are twin selves of yours who are kings and queens, selves who are great artists and musicians; there are also selves who are homeless; there are selves that are involved in situations that are beyond your imagining. This is a basic quantum physics concept that many scientists accept; they do not however tell you how to reach these other selves, in those other universes. You cannot, they say, escape from your own bubble. But with the Quantum Jumping program we do exactly that as attested to by our hundred thousand plus participants in the program during the past two years. With a quantum jump you can reach that twin self and bring back to this reality the energy, or rhythm of that self. One of the many ideas evolving from the concept of infinite 'bubble' universes is that of time. In infinity, everything that can be imagined is happening now. In the present reality there is no now as time is a flow always moving, the words you are reading are already in the past, look away from them and they exist only in your memory. But in an infinite universe, your twin selves exist in every occupation, with every talent and in every time. Picture the greater universe as an endless series of still photographs that become activated when they are observed. The still photographs encompass every moment of time and event imaginable from the birth of the universe to its demise in some unimaginable distant future.

Quantum Jumping is the most unique concept in a hundred years. Now you can be—whatever you can imagine yourself to be. All you need do is to quantum jump. This book will show you how. Google Burt Goldman and you will find a most remarkable man. His concept is fully explained at quantumjumping.com.
