**Generalized Diffusion Processes (Translations of Mathematical Monographs)** N. I. Portenko

Diffusion processes serve as a mathematical model for the physical phenomenon of diffusion. One of the most important problems in the theory of diffusion processes is the development of methods for constructing these processes from a given diffusion matrix and a given drift vector. Focusing on the investigation of this problem, this book is intended for specialists in the theory of random processes and its applications. A generalized diffusion process (that is, a continuous Markov process for which the Kolmogorov local characteristics exist in the generalized sense) can serve as a model for diffusion in a medium moving in a nonregular way. The author constructs generalized diffusion processes under two assumptions: first, that the diffusion matrix is sufficiently regular; and second, that the drift vector is a function integrable to some power, or is a generalized function of the type of the derivative of a measure.

### **From reader reviews:**

#### **John Dinwiddie:**

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Generalized Diffusion Processes (Translations of Mathematical Monographs). Try to the actual book Generalized Diffusion Processes (Translations of Mathematical Monographs) as your close friend. It means that it can for being your friend when you sense alone and beside that of course make you smarter than previously. Yeah, it is very fortunated to suit your needs. The book makes you much more confidence because you can know almost everything by the book. So , let us make new experience and also knowledge with this book.

#### **George Bash:**

Have you spare time to get a day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent their spare time to take a walk, shopping, or went to typically the Mall. How about open or maybe read a book allowed Generalized Diffusion Processes (Translations of Mathematical Monographs)? Maybe it is to become best activity for you. You understand beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

#### **Anita Burns:**

Do you one of people who can't read satisfying if the sentence chained within the straightway, hold on guys this particular aren't like that. This Generalized Diffusion Processes (Translations of Mathematical Monographs) book is readable through you who hate the straight word style. You will find the facts here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to give to you. The writer connected with Generalized Diffusion Processes (Translations of Mathematical Monographs) content conveys the thought easily to understand by lots of people. The printed and e-book are not different in the content material but it just different in the form of it. So , do you still thinking Generalized Diffusion Processes (Translations of Mathematical Monographs) is not loveable to be your top list reading book?

#### **Juan Gilbert:**

Playing with family in a very park, coming to see the sea world or hanging out with pals is thing that usually you may have done when you have spare time, in that case why you don't try factor that really opposite from that. 1 activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Generalized Diffusion Processes (Translations of Mathematical Monographs), you may enjoy both. It is very good combination right, you still need to miss it? What kind of hangout type is it? Oh can happen its mind hangout guys. What? Still don't obtain it, oh come

on its named reading friends.
