Head First Programming: A learner's guide to programming using the Python language David Griffiths, Paul Barry

Looking for a reliable way to learn how to program on your own, without being overwhelmed by confusing concepts? *Head First Programming* introduces the core concepts of writing computer programs -- variables, decisions, loops, functions, and objects -- which apply regardless of the programming language. This book offers concrete examples and exercises in the dynamic and versatile Python language to demonstrate and reinforce these concepts.

Learn the basic tools to start writing the programs that interest you, and get a better understanding of what software can (and cannot) do. When you're finished, you'll have the necessary foundation to learn any programming language or tackle any software project you choose.

With a focus on programming concepts, this book teaches you how to:

- Understand the core features of all programming languages, including: variables, statements, decisions, loops, expressions, and operators
- Reuse code with functions
- Use library code to save time and effort
- Select the best data structure to manage complex data
- Write programs that talk to the Web
- Share your data with other programs
- Write programs that test themselves and help you avoid embarrassing coding errors

We think your time is too valuable to waste struggling with new concepts. Using the latest research in cognitive science and learning theory to craft a multi-sensory learning experience, *Head First Programming* uses a visually rich format designed for the way your brain works, not a text-heavy approach that puts you to sleep.

From reader reviews:

Doug Herring:

What do you consider book? It is just for students because they are still students or the idea for all people in the world, the actual best subject for that? Only you can be answered for that issue above. Every person has diverse personality and hobby for each other. Don't to be pushed someone or something that they don't want do that. You must know how great along with important the book Head First Programming: A learner's guide to programming using the Python language. All type of book would you see on many options. You can look for the internet methods or other social media.

Marvin Boyer:

The particular book Head First Programming: A learner's guide to programming using the Python language will bring someone to the new experience of reading a new book. The author style to describe the idea is very unique. In the event you try to find new book to read, this book very acceptable to you. The book Head First Programming: A learner's guide to programming using the Python language is much recommended to you to read. You can also get the e-book in the official web site, so you can more easily to read the book.

Irene Gonzales:

Playing with family within a park, coming to see the ocean world or hanging out with close friends is thing that usually you have done when you have spare time, then why you don't try matter that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Head First Programming: A learner's guide to programming using the Python language, you could enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't buy it, oh come on its named reading friends.

Betty Bass:

As a student exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some guide, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that studying is not important, boring as well as can't see colorful images on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Head First Programming: A learner's guide to programming using the Python language can make you feel more interested to read.
