## **Membrane Handbook** Winston Ho, Kamalesh Sirkar

Membrane processes have wide industrial applications. This handbook reviews the published literature covering many existing and emerging technologies, presents an in-depth description of common uses in the chemical, petrochemical, petroleum, commercialized membrane processes, and gives a state-of-the-art review of new membrane processes in environmental, water treatment, pharmaceutical, medical, food, dairy, beverage, paper, textile, and other concepts under development. It is intended to be a single source of underlying principles, membranes, membrane modules, process applications include: (1) dialysis for the purification of human blood (the artificial kidney), (2) signs, applications, and cost estimates. It is also electrodialysis for the desalination of brackish water, a first attempt to bridge the gap between the water to produce potable water, (3) reverse osmosis for the desalination of seawater, (4) There are several groups which may benefit ultrafiltration for the concentration of large proteins from this handbook. It can be used as educational molecules from cheese, casein whey, and tannin material for industrial personnel engaged in milk, and (5) microfiltration for the sterilization in membrane separations. For scientists and engineers of pharmaceutical and medical products, beer, engineers active in research and development in wine, and soft drinks. Since membrane processes generally have low capital investment, as a source of reference for the entire field.
