## **Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics** Lauren Pecorino

Many of the cells in our body undergo tightly regulated replication to enable growth to occur and to ensure that damaged or worn out tissues are replaced. Regulation is mediated via many different mechanisms. It is when these mechanisms fail, and regulation is lost, that cancer can result. Recent advances in molecular cell biology have greatly expanded our understanding of the processes and mechanisms which underpin the regulation of cell replication, and what is happening at the molecular level when these fail.

Now in its second edition, *The Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics* gives a fresh approach to the study of the molecular basis of cancer. Written with the undergraduate student in mind, Lauren Pecorino focuses on how our understanding of the defective mechanisms which drive cancer is leading to the development of new targeted therapeutic agents.

Opening with an overview of the key hallmarks of cancer as a disease state, the book then leads us through the principal components of the regulatory machinery through which cell division is controlled and corrupted with the onset of cancer. Within each chapter, students are shown how this molecular knowledge is being applied to develop new targeted therapeutic strategies.

Ideal for courses in the molecular biology of cancer and cancer biology, *The Molecular Biology of Cancer*, Second Edition, is an invaluable resource for any student wishing to gain insight into the molecular basis of the disease and formulate possible solutions for its effective control.

### **New to this Edition**

- Updated research
- Three brand new chapters:
  - "The Cell Cycle": Gives extended treatment of this central aspect of cancer biology
  - "Infections and Inflammation": Focuses on the relationship between infectious agents and inflammation and the onset of cancer
  - "The Cancer Industry": Provides an overview of the process through which drugs are developed and tested
- Enhanced coverage of apoptosis
- Over 25 new figures plus a new color plate section
- A new "How do we know that?" feature, in which experimental methods and results are discussed, thus shedding light on how our understanding of cancer biology is developed
- An extended glossary
- A **companion website** featuring additional resources for both instructors and students:
  - For instructors, the site offers figures from the book available to download and a testbank of multiple-

choice questions with feedback linked to the book for use in formative or summative assessment

- For students, the website features a web link library as well as hyperlinks to primary literature articles cited in the text

### **From reader reviews:**

#### **Richard Riggins:**

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics. Try to face the book Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics as your pal. It means that it can for being your friend when you feel alone and beside that course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know almost everything by the book. So , let me make new experience and also knowledge with this book.

#### **Dawn Hicks:**

This Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics book is just not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book will be information inside this reserve incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This kind of Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics without we realize teach the one who looking at it become critical in imagining and analyzing. Don't possibly be worry Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics can bring any time you are and not make your carrier space or bookshelves' turn out to be full because you can have it with your lovely laptop even telephone. This Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics having excellent arrangement in word as well as layout, so you will not really feel uninterested in reading.

#### **Clarence Frey:**

The actual book Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics has a lot of information on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. The writer makes some research just before write this book. That book very easy to read you can find the point easily after looking over this book.

#### **Carmen Vasquez:**

You will get this Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics by browse the bookstore or Mall. Only viewing or reviewing it could possibly to be your solve trouble if you get difficulties on your knowledge. Kinds of this reserve are various. Not only by means of written or printed and also can you enjoy this book simply by e-book. In the modern era such as now, you just looking by your local mobile phone and searching what your problem. Right now, choose your ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.
