Regional Data to Support Biodiversity Assessments: Terrestrial Vertebrate and Butterfly Data From the Southwest United States Department of Agriculture

Spatially explicit data on the location of species across broad geographic areas greatly facilitate effective conservation planning on lands managed for multiple uses. The importance of these data notwithstanding, our knowledge about the geography of biodiversity is remarkably incomplete. An important factor contributing to our ignorance is that much of the biodiversity data are not readily accessible because they are dispersed across many institutions and often have not been digitized. This report documents our efforts to address these conservation planning constraints. We have compiled extant data on predicted species distributions and more than 680,000 occurrence records for terrestrial vertebrates and butterflies into a single digital database for general use in conducting geographically broad biodiversity assessments across a two-state area (Arizona and New Mexico) that defines the Southwestern Region of the USDA, Forest Service. These data represent one of the most complete databases on species occurrence to be compiled for the Southwest. Our objectives are twofold: (1) to document the types, sources, and characteristics of the data comprising the biodiversity database; and (2) to illustrate the utility of the data in addressing applied conservation problems across the Southwestern Region. We report on three case studies that illustrate how the data can be used to generate simple distribution maps using both point locations and predicted ranges, describe the patterns of species richness for selected taxa across the Southwest, and provide an example of how managers may use the data to identify where potential resource conflicts may be particularly important on National Forest System lands.

From reader reviews:

Mary Edick:

The experience that you get from Regional Data to Support Biodiversity Assessments: Terrestrial Vertebrate and Butterfly Data From the Southwest will be the more deep you looking the information that hide inside the words the more you get interested in reading it. It does not mean that this book is hard to comprehend but Regional Data to Support Biodiversity Assessments: Terrestrial Vertebrate and Butterfly Data From the Southwest giving you enjoyment feeling of reading. The writer conveys their point in particular way that can be understood by means of anyone who read the idea because the author of this publication is well-known enough. This specific book also makes your vocabulary increase well. Therefore it is easy to understand then can go along, both in printed or e-book style are available. We highly recommend you for having this specific Regional Data to Support Biodiversity Assessments: Terrestrial Vertebrate and Butterfly Data From the Southwest instantly.

Richard Poston:

Do you really one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Aim to pick one book that you find out the inside because don't evaluate book by its protect may doesn't work here is difficult job because you are scared that the inside maybe not since fantastic as in the outside search likes. Maybe you answer can be Regional Data to Support Biodiversity Assessments: Terrestrial Vertebrate and Butterfly Data From the Southwest why because the amazing cover that make you consider concerning the content will not disappoint a person. The inside or content is usually fantastic as the outside as well as cover. Your reading 6th sense will directly show you to pick up this book.

Mary McKay:

The book untitled Regional Data to Support Biodiversity Assessments: Terrestrial Vertebrate and Butterfly Data From the Southwest contain a lot of information on that. The writer explains your ex idea with easy way. The language is very clear and understandable all the people, so do not worry, you can easy to read that. The book was authored by famous author. The author will take you in the new time of literary works. It is easy to read this book because you can read more your smart phone, or product, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site as well as order it. Have a nice go through.

Harley Campbell:

What is your hobby? Have you heard this question when you got learners? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person like reading or as studying become their hobby. You must know that reading is very important and book as to be the factor. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You find good news or update about something by book. Amount types of books

that can you choose to adopt be your object. One of them is niagra Regional Data to Support Biodiversity Assessments: Terrestrial Vertebrate and Butterfly Data From the Southwest.
