**Urban Myths about Learning and Education** Pedro De Bruyckere, Paul A. Kirschner, Casper D. Hulshof

Many things people commonly believe to be true about education are not supported by scientific evidence. **Urban Myths about Learning and Education** examines commonly held incorrect beliefs and then provides the truth of what research has shown. Each chapter examines a different myth, with sections on learning, the brain, technology, and educational policy. A final section discusses why these myths are so persistent. Written in an engaging style, the book separates fact from fiction regarding learning and education.

Recognize any of these myths?

- People have different styles of learning
- Boys are naturally better at mathematics than girls
- We only use 10% of our brains
- The left half of the brain is analytical, the right half is creative
- Men have a different kind of brain from women
- We can learn while we are asleep
- Babies become smarter if they listen to classical music

These myths and more are systematically debunked, with useful correct information about the topic in question.

- Debunks common myths about learning and education
- Provides empirical research on the facts relating to the myths
- Utilizes light-hearted, approachable language for easy reading
