## **Handbook of Interview Research: Context & Method** Jaber F. Gubrium, James Holstein

Interviewing has become the window on the world of experience for both researchers and professionals. But as familiar as interviewing is now, its seemingly straightforward methodology raises more questions than ever. What is the interviewer's image of those who are being interviewed? Who is the interviewer in the eyes of the respondent? From where do interviewers obtain questions and respondents get the answers that they communicate in interviews? How do the institutional auspices of interviewing shape interview data?

Drawing upon leading experts from a wide range of disciplines to address these and related questions, **The Handbook of Interviewing** offers a comprehensive examination of the interview at the cutting edge of information technology in the context of a challenging postmodern environment. Encyclopedic in its breadth, the **Handbook** provides extensive discussions of the conceptual and methodological issues surrounding interview practice in relation to forms of interviewing, new technology, diverse data gathering and analytic strategies, and the various ways interviewing relates to distinctive respondents. The Handbook is also a story that spins a particular tale that moves from the commonly recognized individual interview as an instrument for gathering data to reflections on the interview as an integral part of the information we gather about individuals and society.
