**Linear Mixed Models for Longitudinal Data (Springer Series in Statistics)** Geert Verbeke, Geert Molenberghs

This book provides a comprehensive treatment of linear mixed models for continuous longitudinal data. Next to model formulation, this edition puts major emphasis on exploratory data analysis for all aspects of the model, such as the marginal model, subject-specific profiles, and residual covariance structure. Further, model diagnostics and missing data receive extensive treatment. Sensitivity analysis for incomplete data is given a prominent place.

Most analyses were done with the MIXED procedure of the SAS software package, but the data analyses are presented in a software-independent fashion.

### **From reader reviews:**

#### **Ruth Brown:**

Often the book Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) will bring you to definitely the new experience of reading a book. The author style to explain the idea is very unique. When you try to find new book to study, this book very appropriate to you. The book Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) is much recommended to you you just read. You can also get the e-book through the official web site, so you can quicker to read the book.

#### **Pedro Turk:**

Don't be worry when you are afraid that this book may filled the space in your house, you can have it in e-book method, more simple and reachable. This specific Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) can give you a lot of friends because by you taking a look at this one book you have thing that they don't and make anyone more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that possibly your friend doesn't recognize, by knowing more than additional make you to be great folks. So , why hesitate? Let me have Linear Mixed Models for Longitudinal Data (Springer Series in Statistics).

#### **Patricia Cockrell:**

That publication can make you to feel relax. This particular book Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) was colorful and of course has pictures on the website. As we know that book Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) has many kinds or category. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore , not at all of book are generally make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading this.

#### **Thomas Hall:**

What is your hobby? Have you heard that question when you got learners? We believe that that problem was given by teacher with their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person such as reading or as reading become their hobby. You should know that reading is very important and book as to be the issue. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You find good news or update with regards to something by book. Many kinds of books that can you decide to try be your object. One of them is Linear Mixed Models for Longitudinal Data (Springer Series in Statistics).
