This introductory textbook is for students who are interested in learning about and establishing healthy marriage, family, and intimate relationships. With divorce rates high and relationships fragile, books and courses are needed that help students address important issues regarding relationships. The readers of this text examine many important and relevant issues through the lens of theory and research and do so using a written format that is readable, understandable, and easy to apply to one's life. It was written so that each chapter has information that readers will find helpful as they attempt to establish and maintain meaningful, healthy relationships. There are questions throughout each chapter that help readers focus not only on the material but also on how the material relates to their present and past relationship and family situations. The text provides material on the research of John Gottman, the object relations theory of Harville Hendrix, the solution- focused approach of Michele Weiner-Davis, and the PREP approach to conflict management of Markman, Stanley, and Blumberg. These and other topics discussed are very relevant to students' concerns and are addressed in greater depth than found in most other texts. The emphasis is not just on couple relationships but also on family relationships. Therefore, in this book there is extensive coverage of family systems theory and the influence of family rules and family structure on the development of families. There is also material on how change produces transitions in family life that must be assimilated into the family structure, for example, when a couple has their first child. Thus, both couple and family issues are addressed throughout the book. For instructors who want to focus their courses on marriage, family, and intimate relationships, this book would be an ideal choice.
