Five Foundations of Human Development: A Proposal for Our Survival in the Twenty-First Century and the New Millennium Errol A. Gibbs

Five Foundations of Human Development (FFHD) is a philosophical, religious, and practical discourse on human development based on the following five foundations: Spiritual, Moral, Social, Intellectual, and Physical. The authors proffer that human beings possess the capacity to rise to a higher state of civilization when we allow 'Spiritual Intelligence' to underpin 'human intelligence' as our capable guide. The indomitable spirit within human beings that brought civilization out of the Dark Ages and into an Age of Enlightenment demonstrates our capacity to transcend moral hope and optimism for a better world with peaceful coexistence among individuals, families, and nations. This book will help inform, enlighten, and empower individuals and leaders in such fields as engineering, science, religion, politics, the military, and other great institutions to engender solutions to the myriad of unsolved problems of past centuries, problems of the present, and emerging problems of the future. Problems, such as wars, genocide, greed, and the exploitation of human beings begin within our destructive spiritual nature and manifest in the physical nature. Therefore, solutions also lie in the spiritual realm as a counterbalance to the natural realm of human existence. FFHD is a blueprint for human survival based on adherence to physical laws and spiritual laws that transcend a belief in an omnipotent (all powerful), omnipresent (everywhere) and omniscient (all knowing) being. It will awaken the conscience to comprehend the life-threatening issues that face humankind. The solutions, therefore, cannot merely be left only to the educated elite, the military forces, and those in high public and private office. The global significance of this book is that it informs a more communal view of our world.
