**Toward A Grand Strategy Against Terrorism** is a cohesive series of essays prepared by noted academics and counterterrorism practitioners within and associated with the counterterrorism program of the George C. Marshall European Center for Security Studies. These chapters address both the use of military force and the employment of non-military tools, the role of international cooperation, and the importance of the ideological contest. Collectively, they push toward a grand strategy against terrorism. This volume makes the prudence and research and experience of the Program on Terrorism and Security Studies available to all who want to help in countering terrorism: students; those at military graduate schools; private experts on security in the business world; members of police forces and defense departments; conflict resolution experts; and many other sorts of practitioners seeking a sober and highly international approach.
