Applied Categorical and Count Data Analysis (Chapman & Hall/CRC Texts in Statistical Science)
Wan Tang, Hua He, Xin M. Tu

Developed from the authors' graduate-level biostatistics course, **Applied Categorical and Count Data Analysis** explains how to perform the statistical analysis of discrete data, including categorical and count outcomes. The authors describe the basic ideas underlying each concept, model, and approach to give readers a good grasp of the fundamentals of the methodology without using rigorous mathematical arguments.

The text covers classic concepts and popular topics, such as contingency tables, logistic models, and Poisson regression models, along with modern areas that include models for zero-modified count outcomes, parametric and semiparametric longitudinal data analysis, reliability analysis, and methods for dealing with missing values. R, SAS, SPSS, and Stata programming codes are provided for all the examples, enabling readers to immediately experiment with the data in the examples and even adapt or extend the codes to fit data from their own studies.

Designed for a one-semester course for graduate and senior undergraduate students in biostatistics, this self-contained text is also suitable as a self-learning guide for biomedical and psychosocial researchers. It will help readers analyze data with discrete variables in a wide range of biomedical and psychosocial research fields.

From reader reviews:

Janet Smith:

In this 21st century, people become competitive in each way. By being competitive currently, people have do something to make them survives, being in the middle of the particular crowded place and notice by means of surrounding. One thing that often many people have underestimated it for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to endure than other is high. For yourself who want to start reading a book, we give you this kind of Applied Categorical and Count Data Analysis (Chapman & Hall/CRC Texts in Statistical Science) book as starter and daily reading guide. Why, because this book is usually more than just a book.

Barbara Lewis:

Do you one of people who can't read gratifying if the sentence chained within the straightway, hold on guys this specific aren't like that. This Applied Categorical and Count Data Analysis (Chapman & Hall/CRC Texts in Statistical Science) book is readable by you who hate the straight word style. You will find the data here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to give to you. The writer connected with Applied Categorical and Count Data Analysis (Chapman & Hall/CRC Texts in Statistical Science) content conveys prospect easily to understand by most people. The printed and e-book are not different in the content but it just different as it. So , do you even now thinking Applied Categorical and Count Data Analysis (Chapman & Hall/CRC Texts in Statistical Science) is not loveable to be your top record reading book?

Deborah Browning:

Information is provisions for people to get better life, information these days can get by anyone with everywhere. The information can be a information or any news even a huge concern. What people must be consider when those information which is within the former life are challenging be find than now's taking seriously which one is appropriate to believe or which one often the resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take Applied Categorical and Count Data Analysis (Chapman & Hall/CRC Texts in Statistical Science) as your daily resource information.

Charles Morris:

Playing with family within a park, coming to see the sea world or hanging out with buddies is thing that usually you have done when you have spare time, in that case why you don't try factor that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Applied Categorical and Count Data Analysis (Chapman & Hall/CRC Texts in Statistical Science), it is possible to enjoy both. It is very good combination right, you still desire to miss it? What kind of hang-out type is it? Oh can occur its mind hangout people.

What? Still don't buy it, oh come on its called reading friends.
