CRC Handbook of Chemistry and Physics, 91st Edition (CRC Handbook of Chemistry & Physics)

Mirroring the growth and direction of science for a century, the **CRC Handbook of Chemistry and Physics**, now in its 91st edition, continues to be the most accessed and respected scientific reference in the world, used by students and Nobel Laureates. Available in its traditional print format, the **Handbook** is also available as an innovative interactive product on CD-ROM and online. This year's edition adds many new tables and major revisions ...

- Updates for tables on atomic radii of the elements, bond dissociation energies, and spectroscopic constants of diatomic molecules

Section 10: Atomic, Molecular Structure and Spectroscopy

- Major update for the table on atomic transition probabilities (added new elements) and updates for tables on electron affinities and atomic and molecular polarizabilities

Section 12: Properties of Solids

- New table on electron stopping powers of elements

Section 13: Polymer Properties

- New tables on abbreviations in polymer science and on physical properties of polymers

The benchmark of scientific reference since the days of Einstein, Eddington, and Planck, no book is held to a higher standard than the **Handbook of Chemistry and Physics**. Perpetually vetted for misspellings, miscalculations, misperceptions, and misnomers, it is republished every year, so no mistake needs to be long abided, no enhancement long awaited.

The job of editing the **Handbook** requires not only one who is relentless, driven to perpetually push the level of accuracy one more decimal point, but also one who is humble enough and smart enough to understand that the **Handbook**, like science itself, is a living, changing thing, and that it is both a record of achievement and a foundation for further improvement of that record. Until this year, the **Handbook** has been guided through 90 editions by just four editors. The last, David Lide, guided the book through 20 editions. Perhaps most importantly, Dr. Lide guided the **Handbook** into the electronic age, overseeing the creation and the continual improvement of interactive web and CD versions that have now become staples in every research library of note.
