The Impact of Behavioral Sciences on Criminal Law

The Impact of Behavioral Sciences on Criminal Law

New discoveries from neuroscience and behavioral genetics are besieging criminal law. Novel scientific perspectives on criminal behavior could transform the criminal justice system and yet are being introduced in an ad hoc and often ill-conceived manner. Bringing together experts across multiple disciplines, including geneticists, neuroscientists, philosophers, policymakers, and legal scholars, *The Impact of Behavioral Sciences on Criminal Law* is a comprehensive collection of essays that address the emerging science from behavioral genetics and neuroscience and its developing impact on the criminal justice system. The essays survey how the science is and will likely be used in criminal law and the policy and the ethical issues that arise from its use for criminal law and for society.
